IHR SPEZIALIST FÜR KUNSTSTOFFE

## Company

During our many years of professional experience in the plastics industry and logistics, we have built up an excellent network. Therefore, we can offer you a wide range of high-quality plastics from various manufacturers at attractive conditions. Additionally, in cooperation with selected partners, we offer customised compounds according to your requirements.

Thanks to our own logistics, we can properly store your material as well as carry out deliveries flexibly and at short notice.

We at TW Plastics meet the challenges of managing and developing a company according to your standards every day. The basis of our success can only be the trust of our customers and suppliers. You can count on us: We do everything in our power to fulfil your requirements.

Timm Tietje

Carsten Wöhst

## Management

### Timm Tietje

My 17-year career in logistics began with an apprenticeship as a freight-forwarding clerk at Kuehne & Nagel. After receiving my degree in Business Administration, I took-over various tasks in our family-owned and operated company, Teege, Tietje & Sohn. Following the sale of the TTS-Group in 2006, I was responsible for the Dachser food subsidiary in Hamburg. In 2008, I founded the freight-forwarding company tt transporte GmbH & Co. KG in national long-distance transportation, which quickly developed in the German market and is a successful company today with over 33 trucks and 65 employees.

### Carsten Wöhst

In my 16 year career, I have been active in various functions in the plastics industry. I initially worked as an Account Manager in Germany and France, where I was responsible for the entire range of polymers: standard plastics (PP/PE/ABS/SBC/PS), technical plastics (POM/PA/PBT/PC/SAN/TPEs) and high performance plastics (PPS/PSU/PES).

Afterwards, I further developed my knowledge of special plastics as Project Manager for flame retardant polymers as well as MABS, ABS+PA, co-polyester, PMMA, ASA. Then I was responsible for the business of a pan-European distributor as the Director of the business line, Standard Polymers.

## Products

Our product portfolio ranges from standard plastics to high performance plastics from renowned manufacturers. As an independent trader, we offer you an alternative source for products which you are already using today. We generally purchase our products in larger lots via processors, distributors or directly from producers. Therefore, we are not only a possible supplier for you, but are also very interested in buying from you. Your benefit: you can increase your purchase volumes with other suppliers and can, in turn, achieve a corresponding saving.

As a customer of TW Plastics, you have the advantage of buying your products under favourable conditions thanks to our strategic purchasing. Through close cooperation with specialised European compounders, we are also able to support you in finding materials to suit the diverse requirement profiles of your parts.

### **Standard Polymers ( < 100 °C )**

- PS
- ABS
- PP
- PP Comopund
- HDPE
- LDPE

### **Technical plastics ( 100 °C - 150 °C )**

- PA
- PBT
- POM
- PC
- PMMA
- ASA & SAN

### **High performance plastics ( > 150 °C )**

- PSU
- PES
- PPS

## Logistics

TW Plastics offers a complete logistics solution for the plastics processing industry. In order to be able to supply our customers at short notice, we have a connection to a Europe-wide logistics network via our central warehouse in Cologne as well as an additional storage location at our headquarters in Nortorf.

We combine great flexibility with our commitment to high-quality thanks to direct access to our own fleet.
